

Mirrors

Selene

Selene is a round clear glass mirror designed by Signorotto&Partners. The frame is worked with a refined regular geometric pattern to great effect.

MOON-INSPIRED MIRROR

In designing this mirror, the designer was inspired by Selene, the Greek deity personifying the moon. He thus created a prominent frame that looks like a constellation of crystals with the radiance of an ancient Greek moon. The effect is even more emphasized with the available option of an LED-illuminated profile.
